

IC Manage Releases IP Reuse and Design Management Survey Results
*Verification and IP Reuse are Top Two SoC & IC Design Process Segments Needing
Advancement*

LOS GATOS, Calif., June 2, 2011 – IC Manage, Inc. today announced the availability of its third annual “Global Design Management Report”, which covers the results of a 465 respondent survey of IC design professionals.

IC Manage’s [Global Design Data Management report](#) covers the following findings from an industry-wide April 2011 independent, anonymous worldwide survey, along with an ROI impact summary:

1. SoC/IC design primary bottlenecks
2. Organizational drivers for deploying design management systems
3. Top challenges for managing semiconductor IP
4. Design and verification time associated with design management tasks
5. Design management systems - Current adoption and 2011 plans

“IP collaboration and reuse ranked as the number two area requiring technology focus over the next two years, said Dean Drako, President and CEO at IC Manage. “When we combine this finding with the related survey data on the primary challenges of managing IP, the right IP reuse platform will greatly impact semiconductor companies’ efficiency in delivering SoC and IC designs.”

IC Manage’s Global Design Data Management report can be read at: <http://icmanage.com/IP-Reuse-design-management-survey-report-2011.html>

In other news today, IC Manage announced it has extended its Global Design Platform to include IP Central, an open [IP reuse platform](#) for design and verification teams to rapidly publish and integrate IP into existing flows, and to trace bug dependencies.

About IC Manage

IC Manage, Inc. provides high performance design management solutions for companies to efficiently collaborate on single and multi-site designs and obtain maximum IP reuse. The IC Manage Global Design Platform (GDP) lets designers securely track and distribute design, configuration, dependency, and IP property data on multiple projects across the globe. IC Manage GDP includes IP Central, an open platform for integrating, publishing, and tracking IP. IC Manage is headquartered at Suite 100, 15729 Los Gatos Blvd., Los Gatos, CA.
