

Gary Smith EDA Names IC Manage as "What To See @ DAC" Company

LOS GATOS, Calif., June 14, 2010 -- IC Manage, Inc. announced that Gary Smith EDA selected IC Manage as a What to See @ company at the 47th Design Automation Conference. <http://www.garysmitheda.com/paper/What2SeeDAC.pdf>

WHO: IC Manage provides next generation design management solutions for IC design, enabling companies to efficiently and reliably manage single and multi-site design efforts.

WHAT: IC Manage Global Design Platform (ICM GDP) is a next-generation design data management system that efficiently manages, locates and assembles components and delivers reuse across the enterprise. It is the first hardware/firmware/software design data management solution to offer a multidiscipline design assembly, derivative management, real-time worldwide design content delivery, and enterprise-wide and secure multi-company collaborative design project management environment.

WHEN/WHERE: Design Automation Conference (DAC), Anaheim Convention Center, Anaheim, Calif. June 14-18, IC Manage Booth 550.
