

IC Manage Makes Deepchip Best of DAC List

September 22, 2008 – Los Gatos, CA – IC Manage Inc. today announced that it was named in the ESNUG/Deepchip DAC list of most interesting tools in the EDA “Infrastructure” category covering Design Management. John Cooley’s summary, which includes designer commentary, can be found at: <http://www.deepchip.com/items/0475-09.html>

“John Cooley and his contributors perform a valuable service to the semiconductor industry by providing a summary of the conference highlights for designers unable to attend the event,” said Shiv Sikand, Vice President of Engineering for IC Manage. “IC Manage was delighted to be recognized as a technology leader in the area of design management.”

About IC Manage

IC Manage, Inc. provides next generation design management solutions for IC design, enabling companies to efficiently and reliably manage single and multi-site design efforts. IC Manage's Global Design Platform (GDP) – utilizing the Perforce engine – is the first solution to offer design assembly, derivative management and content delivery in addition to scalable, ultra performance revision control, release and configuration management. IC Manage offers IT infrastructure integration for hot backup, high availability and disaster recovery for true 24x7 enterprise availability. IC Manage is headquartered at Suite 100, 15729 Los Gatos Blvd, Los Gatos, CA 95032. For more information, visit us at www.icmanage.com.
