

Deepchip Ranks IC Manage's IP Central as #1 Must-See Product at DAC 2011

LOS GATOS, Calif., June 3, 2011 - – IC Manage, Inc. announced that John Cooley/Deepchip.com ranked IC Manage's GDP-IP Central as the #1 must-see product at the Design Automation Conference 2011. <http://www.deepchip.com/gadfly/gad060211.html>

WHO: IC Manage, Inc. provides high performance design management solutions for companies to efficiently collaborate on single and multi-site designs and obtain maximum IP reuse.

WHAT: IC Manage Global Design Platform (GDP) has been extended to include IP Central, an open platform for maximizing IP Reuse. Design and verification teams can use IP Central to rapidly publish and integrate IP into existing flows, and to trace bug dependencies. Internal and third party IP can be imported to or linked with IP Central from multiple commercial and open source design management systems, as well as internal revision control systems.
